OFFICIAL PAPER OF COCHISE COUNTY

The deepest mine in Victoria, N. S. W., is the Magdala. It is down 2409 feet.

Hon. A. A. Sargent, ex-United States Senator from California, died in San Francisco last Sunday.

Train-robbery, like the new code, is a Texas importation. In the Lone Star state train hold-ups have been reduced to a fine art, but Arizona copies the methods as she does its code.

The glorious rains of the past week continue to make glad the hearts of those individuals who have put their faith and money into cows. Stay with the pot, boys; the heavens are on your side.

Undoubtedly the Territorial Veterinary and Sanitary Board had good grounds, or at least thought they had, in directing a three months quarantine against the cattle of Mexico, but it will be news to our people to learn that Sonora cattle are diseased.

Equal taxation should be the rule and practice of the country. There is no justice in assessing a Mexican cow at the same figure as a thoroughbred short-horn. And yet that is what the Territorial Board of Equalization has just done. Heaven protect us from such equalizing methods.

Under a recent ruling of Commissioner Sparks, no party locating desert land can contract or agree to sell or transfer all or any portion of his entry to any party for a consideration to enable him to prove up on said entry. Proof of having accepted such assistance will be regarded as fraud and the land thrown open for contest.

If a document filed in the office of the County Recorder of Maricopa County is not a lie upon its face, Reavis, the Baron of the Colorado, has succeeded in clinching a man named Brown to the tune of \$1,280, for a deed to some property which he has no title to. Isn't there something in the new Texas code about obtaining money under false pretenses? We appeal to Brother Hughes, who is well versed in the law.

As will be seen by a letter from A. A. McDowell, vice-president of the Mineral Belt Railroad, published elsewhere in this issue, the completion of the road to Benson is a matter fully determined upon. The importance of this connection to our county cannot be overestimated, as thereby we will secure competing rates both east and west, and will be enabled to build up a great commercial center. No other section of the territory will enjoy the same advantages.

This is the way the Phenix land troubles look an outsider: If the boomers of that thrifty burg propose to resort to mob law in order to resist the full investigation of titles to their land, either in the courts or otherwise, they thereby allow a fair inference that something is "rotten in Denmark," and advertise the fact that their fertile valley is a good place to stay away from, rather than to settle in. This is an unbiased opinion, for which the good people of Maricopa are not charged a cent.

The fertility of the valley lands of Arizona is wonderful, considering the little cultivation given them. During a recent ride through the Salt River valley we found the system adopted by the Indians to be largely in vogue among the whites in the cultivation of the land. In immense fields wild sunflowers and cockleburrs were ripening and spreading their seeds broadcast. We were informed that such a thing as cultivating a crop after the seed was planted, was rarely thought of, and yet immense crops were gathered. How an Eastern farmer would open his eyes at such a sight.

Dunbar is giving the Mormons taffy. In closing a labored editorial in the Gazette he says:

God's religion is broader than any creed or set, and any man or set of men, who endeavor by legislation or otherwise to abridge the rights of citizens, will find an opponent worthy of their style in the Gazette.

"Worthy of their style" is good. Perhaps John meant to say he would prove to be a "bushman worthy of their steel," (John is great on quotations) but he evidently had a prejudice against the word for some reason, and substituted "style," which, as we said before, is good.

Much interest has been excited in Mexico in the prospective organization there of a company to undertake the conversion of the mesquite, yucca and other plants into fiber, and by means of a process of which they have knowledge these plants are made to yield a fiber of such excellence that a permanent market therefore has been assured in the United States, thus adding an important export to the growing foreign trade of the country. "In fact," says the Mexican financier, "we regard the new discovery

of the treatment of fibrous plants as far more than equivalent to the discovery of rich gold mines. We have just received some pita fiber from Chiapas, beaten out by the natives with rude instruments. Though good, it is not equal to the fiber obtained from the same plant by the process to which we have alluded. The Indians get a hard fiber, which, had it been treated by the process mentioned, would have been much softer and of a silky character."

It has been intimated that Dick Rule is an aspirant for the position of superintendent of the territorial prison, which rumor says is soon to be made vacant by the resignation or removal of Tommy Gates. Dick would fill the place with becoming grace, and would doubtless make some radical changes in the management of the institution. We should expect to see the convicts adorned with button-hole bouquets for their morning parade, and show other evidences of the esthetic taste of their handsome superintendent. Without any joke, however, we don't know why Dick wouldn't fill the position as creditably as any one else.

WATER STORAGE.
The question of water storage for the purpose of irrigation is being widely agitated throughout Southern California and Arizona, and in many places practical experiments are being made in that direction. The benefits to be derived from large storage reservoirs in proper locations in our own county are incalculable. As an evidence of the great amount of water that falls during the rainy season, the following is noted: One day last week, during a rain storm, the arroya a half mile north of town ran full of water one hundred yards wide and ten feet deep for more than an hour, and it has been raining every day since. Even that amount of water, properly stored would irrigate a large body of land the entire season. There are many places along the San Pedro river where large dams could be built and the surplus water saved, and all the rich lands along the river be thereby brought under cultivation. Here is an opportunity for the profitable investment of capital which rarely presents itself. Here is as fertile soil as can be found under the sun—while the climate is perfection. The only lack is water, and by storing that which goes to waste, that want can be supplied. We should like to see a few dollars of the many millions taken out of poor old Cochise county's bowels spent in developing her surface resources.**Another Spark Ruling.**
The Cheyenne Leader of last Saturday says Land Receiver Garrard received the following dispatch the previous day:
On final desert entries under railroad limits where parties paid 25 cents per acre on original entries, collect \$2.25 per acre, so that the total payments will be \$2.50 per acre.**WM. A. J. SPARKS, Commissioner.**
The Leader thinks the order "the most arbitrary and unjust that has ever emanated from the land office." Many poor men have entered desert land and under the terms prescribed by the government, have paid the first 25 cents per acre. The government has contracted that if they go on, reclaim the land and pay \$1 more they shall receive a patent. In place of this Commissioner Sparks makes his order retroactive, and double the price to men thus involved. Such men have no money to fight such an order in the courts. What can they do? For the sake of the good name of his administration, President Cleveland should send Mr. Sparks on a foreign mission. We presume the foregoing order was general all along the lines of the subsidized roads. It is a lasting pity that some educated men were taught to read and write.**Mr. Ridgely Tilden, editor of the Prospector, returned Monday from a two weeks' trip in the charming Huachuca, much improved in health.**

A Stockton paper says that when an eastern man arrives in Los Angeles and deposits his wealth in one of the local banks, the bank president claps on his plug hat and frantically hunts up a real estate speculator with the information: "There's a new sucker in town. Got \$25,000. Go for him."

Wolcott buys and sells for cash and hence cannot be undersold.**New Store.**
Paul Bahn is offering to the people of Tombstone and the county in general, some of the best bargains in groceries and liquors ever offered in this county. His stock is new fresh and desirable canned goods, wines, candies, in fact everything sold in a first class grocery store is being sold by him at Fairbank prices.**For Sale or Exchange.**
Three thousand shares of stock of the Huchuca Water Company. Par value. Ten dollars per share. Inquire of C. T. BRITTON, Minneapolis, Minn.

Whiskey brings more misery upon the human family than war, famine and pestilence combined. There is but one rational course to pursue for the inebriate and that is a treatment that destroys the appetite for rum. Such is the Acme. Read their advertisement in another column.

Notice.
On and after April 1st, weekly ice tickets will be sold for \$1 and upwards. Ice on weekly customers will not be delivered without tickets.

TERRITORIAL NEWS.

A banking institution in soon to be inaugurated in Tempe.

Professor W. P. Blake is taking a look at the United Verde mines.

Men are coming from New Mexico to work on the Mineral Belt road at Flagstaff.

Rates of passenger fares in New Mexico have been reduced from 6 to 4 cents per mile.

Maricopa county has increased in assessable property \$1,500,000 during the past year.

The building of a court house in Globe is an assured fact. J. Thompson has the contract.

Al Sieber is reported to be improving rapidly and will soon be able to get around on crutches.

Such is fame. Governor Zolick has had a stud horse named after him by an ardent Phenix admirer.

The Miles sword presentation will be September 5th, as the anniversary of the surrender of Geronimo. The 4th comes on Sunday.

Eight parties arrived from San Francisco Thursday, and they have located land in the valley below town aggregating 6,400—Sentinel.

Society papers are asking, "What shall we wear?" What troubles most of us, this weather is how little polite society will tolerate.—Phenix Gazette.

The assessable value of Pima county cattle has been raised over \$250,000, which will make the entire assessable property of Pima over \$4,000,000.

Col. J. G. Albright of the Albuquerque Democrat, has been taking a trip over the Atlantic & Pacific railroad, and is writing some "booming" letters to his paper.

Charlie Vandever has been made railroad agent at Yuma. The many friends of Charlie in this county, where he is well known will be pleased to learn of his settling down in the Territory.

It is reported that a hotel will shortly be constructed at Maricopa, as the junction is now called. This is an imperative necessity, as the present discomforts of that station are as great as ordinary human nature cares to stand.

The name of the man who recently killed Lee Renfro in Apache county is J. V. Brighton, a special officer employed by the stock association of that county. The Holbrook Critic says the killing was unwarranted, and calls on the grand jury to investigate the matter.

Mr. John Gondolfo, of Yuma, an experienced grape grower, states that grape cuttings will produce the second year of planting, but grape slips with roots attached, however small they may be, will bear an average crop the first year. This rapidity of growth and production we do not think can be equalled and certainly not surpassed by any land or climate outside of Arizona.

Those who still persist in believing that the Arizona Mineral Belt Railroad will not be built to Globe may as well forego the delusion. It will not only be built through Globe but to Benson, and connect with the Sonora or Guaymas road. And for the information of doubting Thomases we will say that before snow flies in the fall of '88 they will witness the advent of the track in Globe—Silver Belt.

Mr. Randall, of the Wabash Cattle Company, came in from the White Mountains last Sunday, where they have purchased some ranches. This company is the largest owner of cattle in this county, and their herd will soon outnumber that of our other cattle owners, from the fact that they purchased the cattle almost exclusively. This is the reason for extending their range.—St. John's Herald.

An irrigating enterprise just being completed will prove an important factor in the future prosperity of Holbrook. A substantial dam has been constructed across the Little Colorado, at a point two and a half miles above Holbrook, from which canals are in process of construction, which will irrigate a track of fertile bottom lands four miles wide and stretching a distance of ten and a half miles up and down the river.

A few days ago, while excavating adobe for brick out at Mr. Fickas' farm, about two miles west of town, two or three loaves were found, one containing the cremated remains of some ancient inhabitant, while another, which was very smooth outside and in, and quite thin, seemed of an extra finish, was discovered to have on its inner surface a neat white line drawn and baked in, together with some characters in white, which looked like ancient hieroglyphics. It may prove of value, and it is to be hoped the folks now near Tempe exploring may have their attention called to this specimen, as some additional clue may thus be had to the former inhabitants of this country.—Phenix Gazette.

Which is True.

Mr. L. Goldschmidt, of C. Seligman & Co., who has been spending some days in California, is fully convinced that the newspapers of Los Angeles, have been the main spring of the great boom which has been surging there for some months, and still continues. Mr. Goldschmidt thinks that Arizona newspapers can produce a like result, and in this he is right, but the citizens must stand in and help the newspapers.—Tucson Star.

The celebrated J. H. White butter can be bought only at Wolcott's. This is gilt edge.
